TOWER OAKS BOULEVARD

FORTUNE-CREATING^(SM) VEDIC ARCHITECTURE

Fortune-Creating Vedic Architecture is the world's most ancient system of architecture. It is the knowledge of how to construct and design buildings in accord with Natural Law, in perfect harmony with all the laws of nature. Laws of nature are the universal principles of intelligence within nature that administer, with perfect order, everything from our human physiology to the whole galactic universe.

2000 Tower Oaks Boulevard is the largest building ever constructed using Fortune-Creating Vedic architecture, a system that His Holiness Maharishi Mahesh Yogi has reintroduced to the world. The benefit of Maharishi Vedic is that it aligns the intelligence of every individual in the building with the cosmic intelligence of the universe..This influence promotes greater success, clarity, creativity, intelligence and cooperation among employees.

When we live in harmony with the energy and intelligence of the laws of nature, then that great intelligence supports our life, and life is smooth and peaceful and very fortunate.

Here are a few of the general principles about this architectural system incorporated into the design of 2000 Tower Oaks Boulevard.

- *Orientation:* The building must be oriented perfectly to the cardinal directions, true north, south, east and west, with the entrance of the building in the auspiciously easterly direction facing the rays of the dawning sun.
- *Proportions:* The building must be constructed according to precise mathematical dimensions, in harmony with the dimensions of the cosmos. All measurements of 2000 Tower Oaks Boulevard, interior and exterior, are proportionally designed to mirror the geometry or architecture of the universe.
- *Center of silence:* Every building needs a center of silence or core called a Brahmasthan.
- *Vastu:* The building needs to be placed symmetrically and harmoniously on its site within a defined terrace or Vastu with auspicious slope of the land and any nearby bodies of water in an auspicious direction.

"People intuitively know that buildings affect us deeply and the best buildings are those that make us feel good, and at their highest can elevate your success. That is what the Vedic approach brings to architecture. It offers our tenants high-performance space designed to promote a dynamic and rewarding work experience."

Jeffrey S. Abramson, The Tower Companies
